To Whom It May Concern:

Letter of recommendation for Dejene Tolera

Let me be fair and clear about one thing. I don't consider myself as an experienced teacher because I have been in the industry for less than five years. But I can definitely say I have got the opportunity to work with some brilliant students in Every time I get those students, I get the opportunity to look back and try to improve myself both as an academician and as a human. I also realize that I am passing through a certain relief from the challenges life has to offer to me and I always feel proud because being part of someone's good and bad moments is not easy. Dejene Tolera is one of those students to me. I have known him for the past two years. I taught him one course (Data Mining and Data Warehousing).

He performed extremely well on the course. I also was his advisor when he was doing his final year industrial project. Therefore, I can proudly say he was one of the best students I have known since the day I started teaching. There are some amazing qualities I appreciate from Dejene. First and foremost, his devotion and commitment to his goal are second to none. Second, he doesn't like to surrender to challenges. Third, he is a good communicator and can easily fit into any team. Furthermore, he doesn't hesitate to raise anything he feels is unclear to his.

Finally, he is respectful to his teachers and Colleagues and he is known for his amazing discipline. Therefore, I believe if you give Dejene Whatever job, it will be you who will benefit from it because he will never disappoint.
